BHARATHU RAJ R

Aspiring Cybersecurity Analyst | Purple Team | VAPT & SOC

bharathuraj.r@gmail.com | +91-8637481489 | Chennai, Tamil Nadu | www.linkedin.com/in/bharathu-raj-r-b04198375 | github.com/Bharathraj0777

CAREER OBJECTIVE

Final-year Cybersecurity student with hands-on experience in VAPT, Web/API Security, SOC monitoring, SIEM, SOAR, GRC, and network security. Proficient in Burp Suite, Nmap, Nessus, Metasploit, Splunk, Wazuh, Suricata, and OWASP ZAP. Experienced in vulnerability assessment, log analysis, security monitoring, alert investigation, and threat detection through internships, labs, and security projects. Seeking an entry-level Cybersecurity Analyst, SOC Analyst, or VAPT role.

TECHNICAL SKILLS

Security Tools: Burp Suite, Nmap, Nessus, Metasploit, Hydra, Splunk, Wazuh, SQL map, theHarvester, OWASP ZAP and other security tools.

SOC / Blue Team: SIEM, EDR, SOAR, XDR, IDS, IPS, Log Analysis, Network Traffic Analysis, Windows Event Logs, Security Monitoring.

VAPT & Web Security: Vulnerability Assessment, Penetration Testing, Web/API Security Testing, OWASP Top 10, Authentication & Authorization Testing, Privilege Escalation.

Networking: TCP/IP, DNS, DHCP, HTTP/HTTPS, TCP/UDP, ARP, ICMP, NAT, VPN, Firewalls, Routing & Switching, Network Traffic & Packet Analysis

GRC & Security Governance: Risk Assessment, Security Policies, Access Control, Security Controls, Compliance Fundamentals, Risk Management, Governance

Scripting & Systems: Python, Bash, Kali Linux, Ubuntu, Windows Server, Linux, Git, VirtualBox/VMware

AI & Automation: AI-assisted Security Research, Log Analysis, Threat Analysis, Python Development & Security Documentation.

PROJECTS

1. Network Packet Sniffer (PacketView Pro) — Internship Project - 2026

- Developed a Python-based network packet sniffer to capture and analyse real-time network traffic.
- Implemented packet filtering, searching, and exporting for efficient traffic investigation.
- Added a basic IDS feature to identify and flag suspicious network traffic.

2. Wazuh Windows Security Monitoring Lab (SIEM/EDR) - 2026

- Deployed Wazuh SIEM and connected a Windows endpoint for centralized security monitoring.
- Analysed Windows logs and security alerts to identify suspicious activities.
- Practiced SOC workflows including log analysis, alert investigation, and threat detection.

3. Splunk Detection Engineering & Threat Detection Lab – 2026

- Developed and tested 5 SPL-based detections for authentication, PowerShell, process, LSASS, and network activity.
- Mapped detections to MITRE ATT&CK and performed detection testing, tuning, and investigation analysis.

CERTIFICATIONS

- EC-Council CEH (Certified Ethical Hacking) with AI
- Fortinet NSE 1 Certified in Cybersecurity and Cloud Security
- Fortinet NSE 2 Certified in Cybersecurity
- IBM's Getting Started with Cybersecurity
- Cisco's Junior Cyber security analyst (Cisco Networking Academy)
- Cisco Introduction to Cybersecurity (Cisco Networking Academy)
- Cisco Networking Basics (Cisco Networking Academy)
- Capriciosec University's Certified Ethical Hacking and Penetration Testing
- Ethical Hacking Course (PrepInsta)

INTERNSHIP / WORK EXPERIENCE

1. Cybersecurity Advanced Internship — Web/API VAPT & SOC — Supraja Technologies *July 2026 – Present | Vijayawada, On-site*

- Working on advanced web application and API penetration testing, plus some SOC-related tasks — getting exposure to both the attacking and monitoring sides of security.

2. Cybersecurity Internship — Web Application VAPT — Supraja Technologies *Jan 2026 – May 2026 | Vijayawada, On-site*

- Assisted the security team with vulnerability assessments and penetration testing; completed tasks, assessments, mock interviews, and assignments as part of the internship.

3. Cybersecurity Internship — REDYNOX *Jul 2025 – Aug 2025 | Online*

4. Python Programming Internship — Code Alpha *1 Month | Online*

EDUCATION

B.E., CSE (Cybersecurity) — Dhanalakshmi College of Engineering, Tambaram *2023 – 2027*

CGPA: 7.92 / 10.00 (through 6th Semester)

CYBERSECURITY PRACTICE

- Ranked Top 6% in TryHackMe Platform Level 8 (Hacker)
- Completed 60+ labs on PortSwigger's Web Security Academy.
- Built a mini-Wireshark tool called as Network Packet Sniffer with a basic IDS feature.
